

# SMART AUTOMATION

## FOR SMART FACTORIES

DIPL.-ING. PETER STEINL  
**LWB AUTOMATION GMBH – A MEMBER OF STEINL GROUP**

“For decades, LWB has been setting new, important impulses in the elastomer and thermoplastics industry with technical developments and innovative processes. It was only logical to set up another area within the Steinl Group that covers the automation business.

With the expansion of our portfolio as a full-range supplier, our customers benefit from a comprehensive service package. Apart from machine and process engineering, we at LWB now offer our customers complete automation solutions including robotic and handling systems designed in-house.”

# LWB AUTOMATION GMBH

## IN GERMANY'S SILICON VALLEY OF MECHANICAL ENGINEERING

We deliberately chose the Rhine-Neckar Metropolitan Region as our headquarters. 146,000 companies including ten of the top 100 stock exchange listed companies as well as medium-sized companies and start-ups are based here. This balanced mix of industries with a focus on plant and mechanical engineering is well connected to domestic and international transportation networks.

### EXCELLENTLY POSITIONED IN THE FUTURE

The Rhine-Neckar Metropolitan Region is not only centrally located and optimally developed, it also attracts specialists from all over Germany. Through the universities and non-university research institutions in the catchment area of the Rhine-Neckar Metropolitan Region and the manufacturing industry, we will continue to receive young, well-educated specialists.

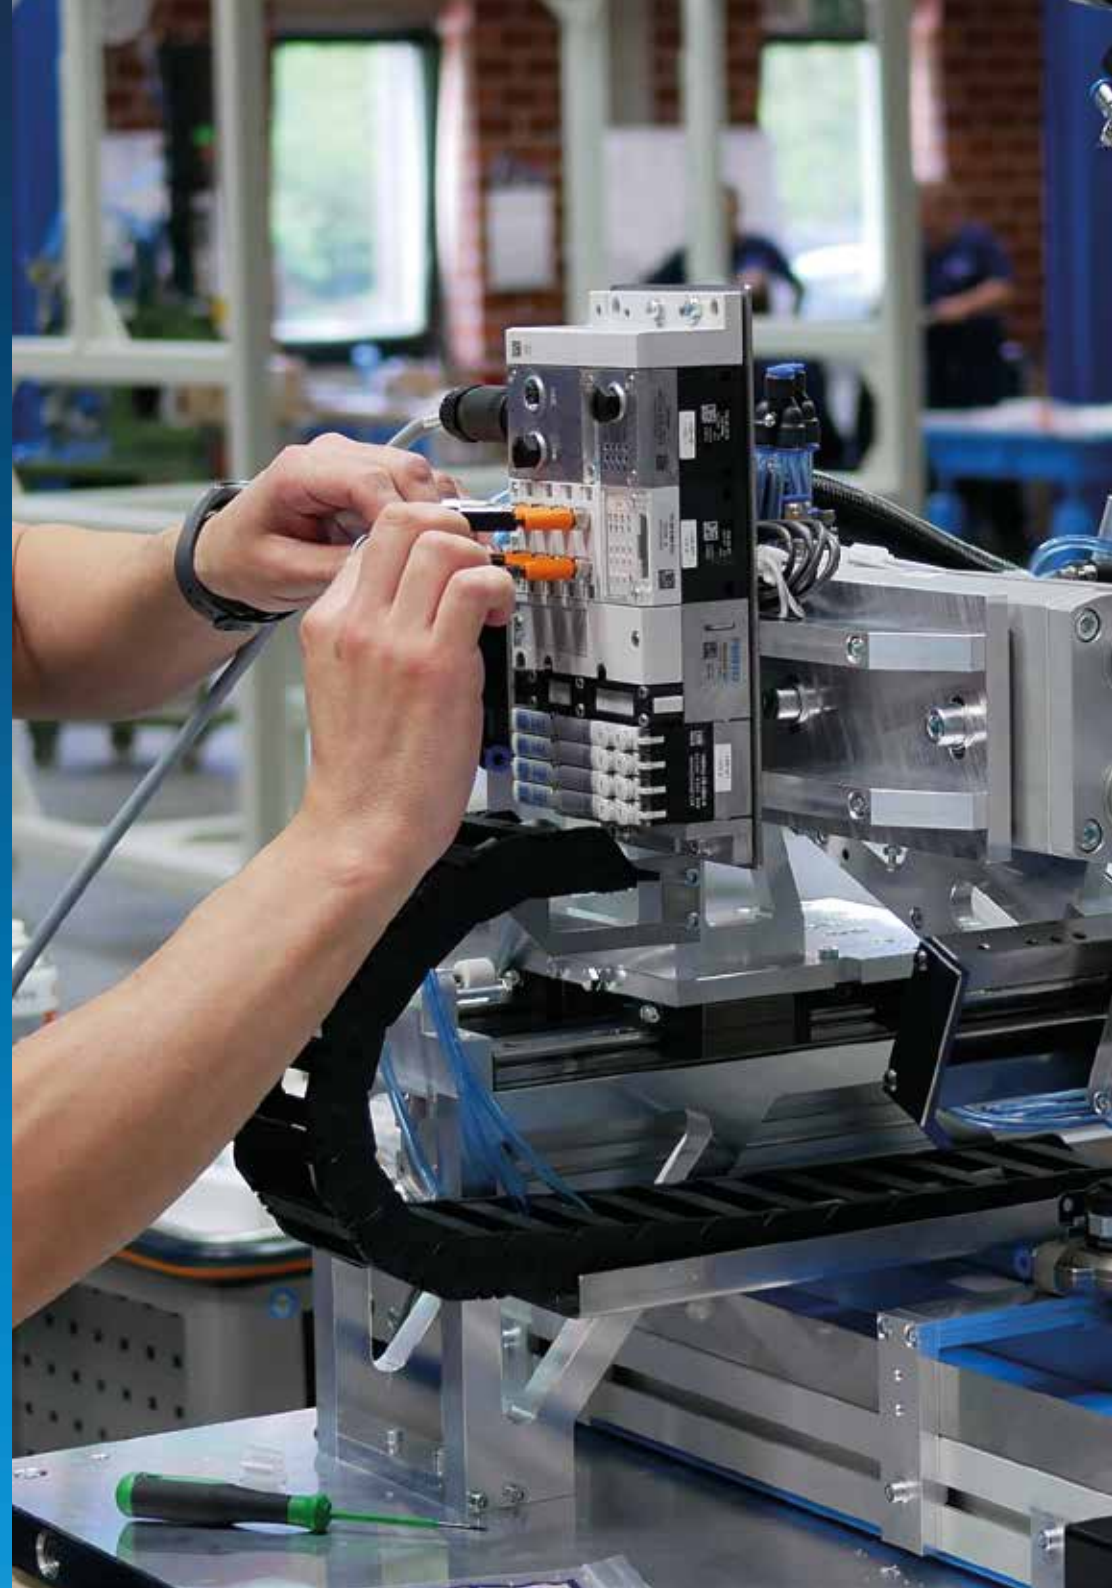

# LWB AUTOMATION GMBH

After the official start in early 2017, we have been fully operational since September 2017. We now have a highly motivated, talented team of over 30 mechanical and other specialist engineers, customer consultants and support specialists. And the team is likely to grow further.

Our claim is to help you to optimize inefficient processes through customized automation solutions.

We have already completed a large number of successful projects. This confirms that we are on the right path. **A path at your side.**

In the beginning of 2018 we have expanded and added two new production halls and additional offices. This allows us to take on and supervise even larger projects and initiatives. Successful innovations simply require space.

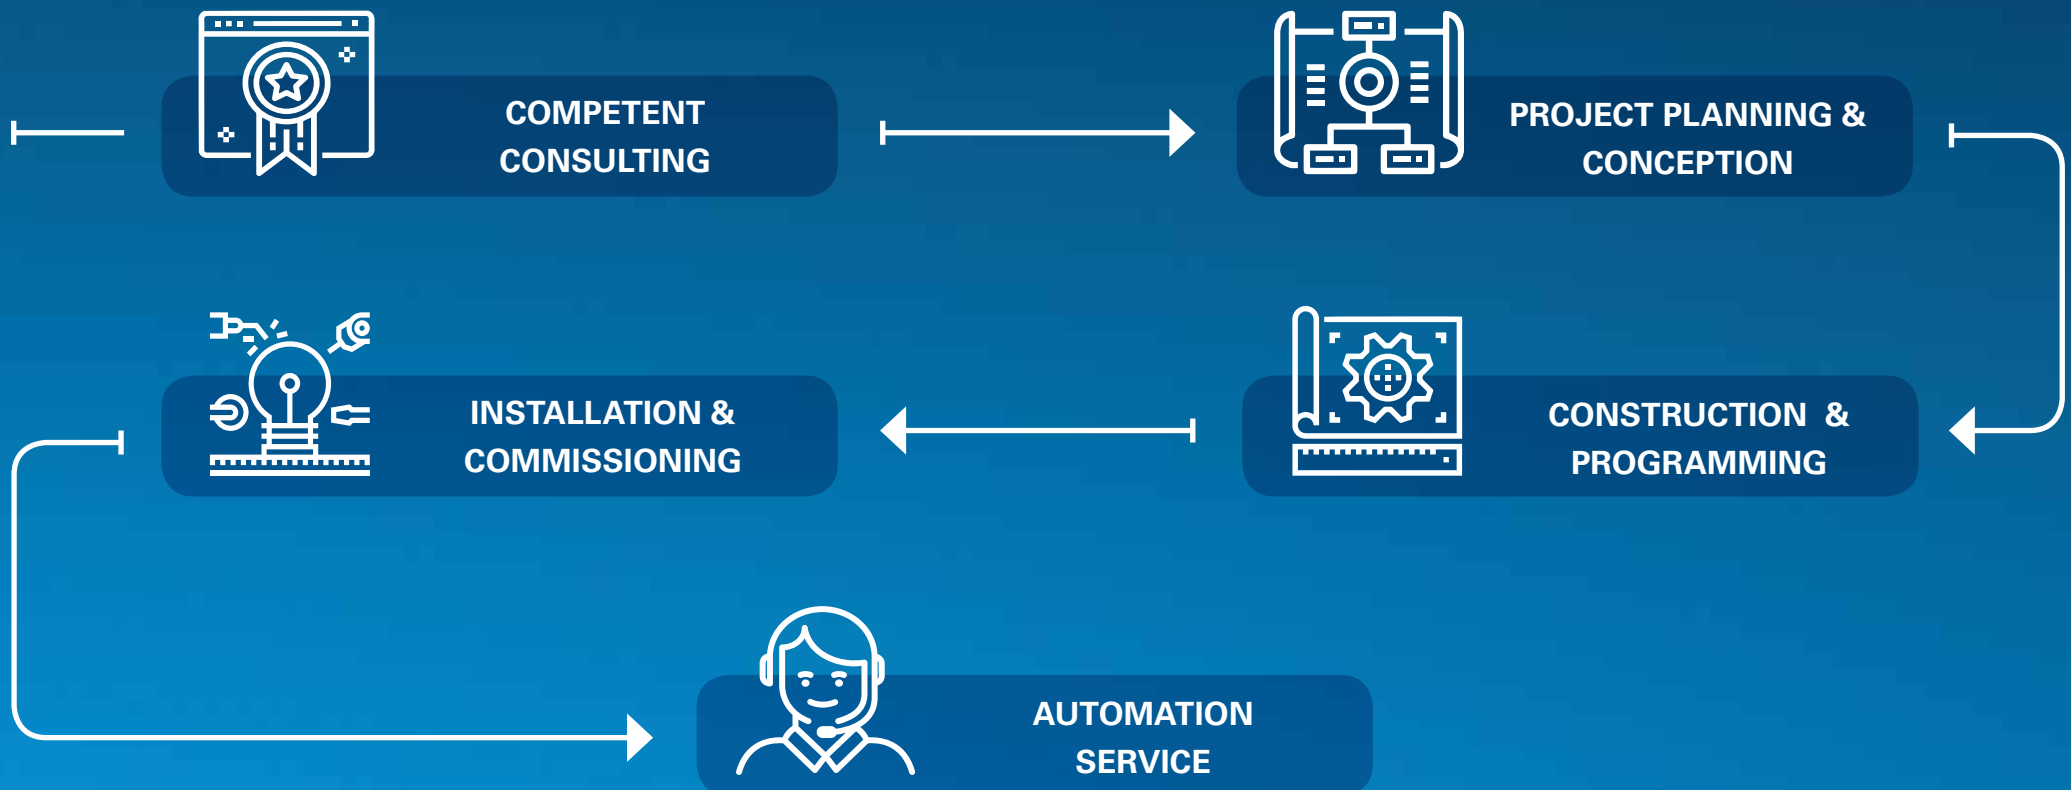

# HOW WE WORK

## WE SHOW YOU THE WAY TO YOUR AUTOMATION SOLUTION

As a specialist in the field of automation, LWB Automation offers you more than just the industry standard. Our automation solutions prove optimisation in your

production processes through high quality, precision and process reliability. We offer you both attractive integrated solutions as well as individual retail services.

Benefit from our experience and our pioneering expertise in automation solutions.

# AUTOMATION CONNECTS PROCESSES

## WE CONNECT PRESENT AND FUTURE

REVOLUTION AUTOMATION: THE FUTURE OF YOUR PRODUCTION STARTS TODAY!

We create innovative, lucrative automation solutions for your individual projects – from individual services to complex, integrated solutions. This simultaneously increases your planning security and process reliability.

Our aim is to increase the output and to ensure and optimise quality standards.

*We outline your options and you decide which way we go.*

With our highly talented and experience team of designers, programmers and mechatronics technicians, we develop new process optimisation solutions with you.

### OVER 400 YEARS OF EXPERIENCE

Our team of 30 employees has 400 years of experience in the construction of special-purpose machines.

### FULL COST CONTROL AT A GLANCE

You get 100% transparency by automating and digitising your production.

### TRACEABLE FROM START TO FINISH

Our automation modules record every single step of your automation process making it verifiable.

### REDUCING MANU- FACTURING DEFECTS

Our automation solutions reduce the error ratio within the production process and increase process reliability.

**We develop and design customised automation solutions. As your one-stop-shop for individual automation solutions, we guide you on your path to productivity increases and cost reductions in a target-oriented and safe manner.**

# SMART SERVICE FOR SMART BUSINESSES

## AVAILABLE WORLDWIDE 24/7 - FOR YOUR SUCCESS

With us you get the required edge through know-how and smart innovations. True to the motto:

### **Smart Automation – For smart Factories!**

Let yourself be surprised how you can reduce costs and avoid longer machine downtime with our service from plant

conversions to retrofitting to the maintenance and repair of your machines.

*Our service staff delivers you customised solutions for your individual challenges.*

## WE CONSTANTLY WORK ON MORE INNOVATIVE SERVICE SOLUTIONS FOR YOU

With our AUGMENTED SERVICE SUPPORT we can inspect your automation plants via remote within seconds from anywhere in the world. Manage your service cases 24/7 by using our app on

the service platform. This is where we also clearly list and document your service cases, providing you with 100% transparency of your service cases.

TAKE ADVANTAGE OF OUR AUTOMATION EXPERIENCE AND BENEFIT FROM OUR EXTENSIVE KNOW-HOW.

**DELIVERY OF  
SPARE PARTS**

**MAINTENANCE &  
SERVICE**

**PLANT CONVERSION &  
RETROFITTING**

**TRAINING**

**AUGMENTED SUPPORT**

**We advise, optimise, automate and organise your individual plant conversions or retrofitting requirements.**
